

CONTACT LENS (LEVEL 2)

GET THE EXPERT KNOWLEDGE & SKILLS REQUIRED TO PROVIDE SPECIALIST CONTACT LENS CARE

Medical Contact Lenses Level 2 is for Aspiring Contact Lens Specialists wishing to specialise in the contact lens management of corneal and external disease including advanced keratoconus, post corneal surgery, therapeutic and cosmetic contact lenses, paediatric contact lenses and will include hybrids, piggy back contact lenses, large diameter corneal lenses, mini-sclerals and sclerals.

The curriculum will allow you to:

- Identify and select the most appropriate lens for patients with complex refractive and clinical needs
- Fit and manage specialist designs to include hybrids, mini-sclerals and sclerals
- Assess, fit and manage patients with advanced keratoconus in contact lens practice
- Assess, fit and manage children under 8 years of age with contact lenses
- Assess, fit and manage patients who require bandage, therapeutic, cosmetic or occlusive contact lenses
- Contact lens fitting following corneal and refractive treatments
- Investigate and manage anterior segment conditions related to contact lens wear
- Manage contact lens discomfort, intolerance, complications and much more
